Found out from Liz why there was confusion. She saw your note but didn't understand from it that the banner was going up. So, in the future, can you please let her know of the changes as you did in the note below but also add that it is good to go with the changes? Thanks.

Roxanne Smith

We are using "people" going forward rather than "citizens" because all the humans in the area may not be citizens.

EPA is working closely with first responders and coordinating with local and state officials to ensure the safety of people impacted by water contaminated as a result of the spill.
